Intensive Care for Soft Nails

Jessica Vartoughian, the world's foremost authority on natural nail care and founder and CEO of JESSICA Cosmetics International, presents Critical Care for anyone who suffers from soft, weak, brittle nails that are too brittle and unhealthy to grow. Formulated with JESSICA Cosmetics' exclusive Protein KSW® fortified with calcium and intense strengtheners, Critical Care sets a new standard for boosting growth and strength of severely weakened nails that just won't grow.

Product Description:

Sets a new standard for boosting growth and strength of severely weakened nails that just won't grow. Using our exclusive Protein **KSW**® fortified with calcium and intense strengtheners, penetrates the nail and increases keratinization, creating a protective barrier to allow for maximum growth.

Miraculous Protein **KSW** complex combines hydrolyzed keratin, soy and wheat proteins, plus calcium to fortify, strengthen, add flexibility, and harden soft nails to resist peeling, chipping, and splitting.

For best results, the **Critical Care** Treatment should only be used until the nail condition improves or no longer than 4-6 weeks. Once nail condition improves, you are ready to switch to *Reward*, JESSICA's Basecoat for Normal Nails.

Instructions for Use:

When used alone as a treatment: Apply to clean, bare nail. Generously apply 2 coats using 8-10 strokes. Apply under and over the nail, sealing the edges.

When used with Custom Colour:

Generously apply 1 coat to clean, bare nail, using 8-10 strokes under and over the nail, sealing the edges. Apply 2 coats of JESSICA Custom Colour using the same application technique. Apply 1 coat of *Top Priority*™ as a topcoat using the same technique. Seal the manicure with *Brilliance*.
